"That Girl"

Visit ["That Girl"](#) on MotoLyrics.com

All eyes on her center of all attention
All eyes can do is trying to make a conversation
She shines, shines so bright
All the frames are give to silver
Her life seem so fine I'm just making conversation
With myself

And who's that girl living in my head
She looks like me but she talks like someone else
Her eyes look a lot like mine when she smiles
Right back from the other side
She moves with confidence
Not afraid of every consequence
Her eyes look a lot like mine when she smiles
Right back from the other side
Right back from the other side

She's wine and dine
She knows important people
Cannot always turn and smile
Without a hesitation
She's someone else

But who's that girl living in my head
She looks like me but she talks like someone else
Her eyes look a lot like mine when she smiles
Right back from the other side
She moves with confidence
Not afraid of every consequence
Her eyes look a lot like mine when she smiles
Right back from the other side
Right back from the other side

That girl
That girl
That girl
