"Be Right There"

Visit "[Be Right There](#)" on MotoLyrics.com

All day and through the night
You place a wall between us
Something is on your mind
While Im missing your touch
It hurts to see your face
Expressions all have gone
Cant help but think that I
Have done something wrong
(chorus)
When you lay your head down to sleep
When you feel you're not close to me
When it seems life isn't going your way
Just know that I'll be right there
When you need that little extra step
Ill be with you so don't forget
To turn to me, I'll give you all my love
Just know that I'll be right there
You stay up half the night
And force yourself to sleep
I know you want to tell me
But you're scared to feel too weak
I promised I'll be with you in times good and bad
I wanna show you Im the best youve ever had
So when you're ready please come take my helping
hand
Just know I'll understand
(chorus)
(bridge)
Don't worry things will be okay
Weve made it last this far
I know well always be together
This I know for sure
I know you have your doubts
Some days I have mine too
But we can make it through
Call on me, Im there for you
(chorus)
