Tonight I just wanna be with my friends
I don't want the night to ever end
We're gonna roll down Mill
Till all the lights in the town burn out
Roll all the windows down
And we'll just drive around
Sometimes not havin' a place to go
Lands you right where you need to be

I can't imagine a better night
I'm here with the best of my friends
I simply could not ask for more
These people are my family
And these people have shown me
What feeling infinite is all about

Tomorrow the sun will rise and shine
And Arizona does like it any other
We shine hotter and brighter than anyone
So, Arizona, scream it loud
Let them hear it on top of the clouds
We shine hotter and brighter than anyone

I can't imagine a better night
I'm here with the best of my friends
(I'm here with the best of my friends)
I simply could not ask for more
These people are my family
(These people are my family)
And these people have shown me
What feeling infinite is all about

And let's take this down to the shore
And party it up like never before
One last time for the road.

Time has gone by crazy fast
And the time we've had together didn't last

But I swear on my life
And you gotta swear too

That this is the life that we're
Always gonna always return to.
No matter how old we get
No matter how far we go

This is the life
This is the life

They can never take these summer days
They can never take our obnoxious ways
No one will ever be taking away the memories
We've created throughout the years of being side by
side together

This is the life
This is the life

I can't imagine a better night
I'm here with the best of my friends
(I'm here with the best of my friends)
I simply could not ask for more
These people are my family
(These people are my family)
And these people have shown me
What feeling infinite is all about
