Let's just take a snapshot of this moment
To last us a life time, to last us a life time, to last us a
life
Let's just take a snapshot of this moment
To last us a lifetime, it'll last us a life time, all the time
that you'll be mine.

You've got my heart pounding so fast it feels like it's
gonna
Escape from my sweater
And I know laying here with you
It doesn't get any better
And I hope I'm not coming off a little bit too cliché
When I tell you that every time I'm with you, I forget
what to say

So I just
Kiss you lightly, hold your hands tightly
Kiss you lightly, hold your hands tightly
Kiss you lightly, hold your hands tightly now

So let's just take a snapshot of this moment
To last us a life time, to last us a life time, to last us a
life
Let's just take a snapshot of this moment
To last us a life time. It'll last us a lifetime, All the time
that you'll be mine.

Out by the lake is where we spent the rest of our night
Under clouds that were dark and stars that never
shined quite as bright
And I looked in your eyes and I'd never felt so alive
And I knew in my heart that we'd never be apart

And I know just what I want to say but not how to phrase
it
So I just
Kiss you lightly, hold your hands tightly
Kiss you lightly, hold your hands tightly
Kiss you lightly, hold your hands tightly now

So let's just take a snapshot of this moment

To last us a life time, to last us a life time, to last us a
life
Let's just take a snapshot of this moment
To last us a life time. It'll last us a lifetime, All the time
that you'll be mine.

And when I lay with you
And hold you close to me
I feel our hearts beat as one
And when I say to you
You mean the world to me
I mean it with all my heart
So I took a snapshot of this moment
Cause I never wanted to forget
The look of the sky, the sparkle in your eyes
The epitome of perfection

So let's just take a snapshot of this moment
To last us a life time, to last us a life time, to last us a
life
Let's just take a snapshot of this moment
To last us a life time. It'll last us a lifetime, All the time
that you'll be mine
