Thank you for being a friend when it's all that I needed  
And thank you for being my legs when I could not stand  
Thank you for being the light that shined my darkest  
day  
And thank you for holding my hand.

Thank you for all the support that you've given me  
through the last year  
And thank you for reminding me: it's a half full cup  
Thank you for saving me when I was at rock bottom  
And thank you for not giving up

Thank you for giving my heart that extra boost when I  
needed it  
And thank you for making me laugh when I wanted to  
cry  
Oh and thank you for making me feel like I'm on top of  
the world  
And thank you for not wondering why

This song's for you if you appreciate life  
And it's for you if you don't let one single day go by  
Without living it to the fullest and giving everything  
you've got  
Cause at the end of the day who knows if tomorrow's  
coming or not?

So this one's for all the people in this world now and  
gone  
Who ever gave a piece of themselves to help another  
one move on  
Who appreciated life for all the good things and the  
bad  
And at the end of the day were grateful for everything  
they had

This one's for you  
This one's for you

These are the best days of our lives  
And I will regret not one single thing

I will turn my stereo up loudest it will go  
Take a deep breath, and I will sing

That I promise not to let one single  
Moment that I live  
Go to waste when I can use it  
Spending it with you  
I promise not to let one single  
Moment that I live  
Go to waste when I can use it  
Spending it with you

I said I promise not to let one single  
Moment that I live  
Go to waste when I can use it  
Spending it with you  
I promise not to let one single  
Moment that I live  
Go to waste when I can use it  
Spending it with you
