You're standing with your list of regrets that you can't  
get past yourself  
You wish so bad that you could make the mark  
But your dreams are stuck on a shelf  
And all you want to do is turn back time  
And redeem the days you lost  
But shame keeps calling out your name  
The chains refuse to fall

#### CHORUS:

But it's not over, it's not over  
This is the moment that grace walks in  
With arms wide open, arms wide open  
To tell you this is not the end  
When doubt is strong and your will is weak to even  
believe again  
That's when grace, that's when grace walks in

You once believed that you could change the world  
With a fire deep in your soul  
Your faith was strong and the call was clear  
You were sure you could make a new road  
Like so many, the flame grew dark  
And your confidence hit the wall  
There always seems to be a lot of big questions  
But the answers seem so small

#### CHORUS

Just in the nick of time  
Right there to save our lives  
Grace is greater  
Grace is greater
