Cold road ahead  
Night wraps me in

Weak - I feel so weak  
My eyes are bloody red  
God, don't let me sleep at the wheel

You set it off - set it off  
Hope the noise will wake you  
There's no release - no release  
White knuckles will always betray you

Drive - no, I can't stop  
Lights flash before my eyes  
God, don't let me sleep at the wheel

You set it off - set it off  
Hope the noise will wake you  
There's no release - no release  
White knuckles will always betray you

You set it off - set it off  
She wraps me under her wing  
There's no release - no release  
But the temptation is too big

Air - I need cool air  
But heat keeps crawling in  
God, don't let me sleep at the wheel

You set it off - set it off  
Hope the noise will wake you  
There's no release - no release  
White knuckles will always betray you

You set it off - set it off  
She wraps me under her wing  
There's no release - no release  
But temptation is too big
