stay in the line for the judgement day
locked inside this cage of hate
bound by lies of constant pray
brought into her shades of pain
the stormbringer
the stormbringer
please save me from this shit I need
chorus: push it down
interwinning final breath
push it down
throw some light upon this race
they make you wish that you don't exist

cause you're on their deadly list
ruthless he stomps in your brain
stay out of this burning space
the stormbringer
the stormbringer
please save me from this shit I need
chorus: push it down
interwinning final breath
push it down
throw some light upon this race
