Title: Lost among the stars

Out in the night

We can burn like the brightest sun

Out in the night

There's a place

That I know of where we can be eternally

Forever one

Lost among the stars

I saw you there

And that was all that mattered

You and only you

Among the stars

And nothing else would matter

Lost among the stars

I saw your face

And I knew that was where

I always want to be

Among the stars

Just you and me

Among the stars

Love can be like that

Can take you up

Or burn you out so badly

Lost among the stars

That summer night

When love will take you

When you're least prepared to go

I can't forget I love you so

Out in the night

We can burn like the brightest sun

Out in the night

There's a place

That I know of where we can be eternally

Forever one

Lost among the stars
The summer night
Can take you where you going

Lost among the stars
The summer night
Can take you where you going

Lost among the stars
The summer night
Can take you where you going

Lost among the stars
The summer night
an take you where you going
