Imagination

Neil in Innes Book of Records
You can disagree with me
and I'll agree with you
Be just what you want to be I'll share your point of view
You can demonstrate and shout and wheel the
execution cart
You can ask me anything but don't expect my answer to
be smart

Don't make me use my imagination
I think it must have blown a fuse
Just keep on with your information, oh yeah
It must be something someone can use

I'll buy any gadget that you tell me I need
I believe in God or anything guaranteed
I can watch the news at 10 because I know the camera
never lies
Just sittin' in my armchair I can see it with my own two
eyes

Don't make me use my imagination
I think it must have blown a fuse
Just keep on with your information, oh yeah
It must be something someone can use

Don't make me use my imagination
I think it must have blown a fuse
Just keep on with your information, oh yeah
It must be something someone can use

I said don't make me use my imagination
I think it must have blown a fuse
Just keep on with your information, oh yeah
It must be something someone can use
