Some were in the way of Sunshine
You find the dark some how when you see the spark
It burns your heart

Someones gonna Rescue you and bring you back
I see you standing there I hear you call
The way you look at me you donot see at all

Someones going rescue you before you fall
no one can do the things you do

Someone can save you
you scared of the way it goes sometime in the night
But it gets the best you you could help a fight
Someones gonna rescue you and make it right

Someones gonna rescue you

Someones gonna rescue you.
