

Neil Young "The Way"

Visit "[The Way](#)" on MotoLyrics.com

The way, we know the way. We've seen the way
We'll show the way
To getcha back home
To the peace where you belong

If you're lost and think you can't be found
We know the way, we've got the way
We'll lead the way
To getcha back home
To the peace where you belong

The way, we know the way. We've got the way
We'll share the way
To bring you back home
To the peace where you belong

So many lost highways
That used to lead home
But now they seem used up and gone
They sure had the magic
When they were first found

But not this road
This road has never been closed
It's still brand new

The way, we know the way. We've seen the way
We'll show the way
To bring you back home
To the peace where you belong

If you're lost and think you can't be found
We know the way. We've got the way
We'll lead the way
To getcha back home
To the peace where you belong

Where you belong, where you belong, where you
belong
We know the way
To getcha back home
To the peace where you belong

When faceless and anonymous
Come to beat down your door
And say you're all washed up and done
You can just say they have nothing in store

To touch this soul
Because they just don't know
They just don't know
The way

The way, we know the way. We've seen the way
We'll show the way
To getcha back home
To the peace where you belong

The way, we got the way, we know the way
We'll lead the way
To getcha back home
To the peace where you belong

If you're lost and think you can't be found
We know the way. We've found the way
We'll share the way
To getcha back home
To the peace where you belong

The way, we know the way. We've seen the way
We'll show the way
To get you back home
To the peace where you belong
