Went through last week yesterday
And I didn't know it was gonna be this way
Went through tomorrow twice today
And I didn't know it was gonna' be this way

This is how I should...
This is how I should...

This is how I should...
This is how I should...

Went through last week yesterday
And I didn't know it was gonna be this way
When I went through tomorrow twice today
And I didn't know it was gonna' be this way

This is how I should...
This is how I should...
(Echo)
This is how I should...
This is how I should...
(Echo)
This is how I should...

My reflections have been stolen
Again and again like and addiction
My memories, they're mementos
Crawl across the streets just like little red ghosts

Went through last week yesterday
And I didn't know it was gonna be this way
When I went through tomorrow twice today
And I didn't know it was gonna be this way

This is how I should...
This is how I should...
(Echo)
This is how I should...
This is how I should...
(Echo)
This is how I should...

My reflections have been stolen
Again and again like and addiction
My memories, they're mementos
Crawl across the streets just like little red ghosts

I'll beat me over and over
(Echo)
I'll beat me over and over
Until I'm you

I'll beat me over and over
(Echo)
I'll beat me over and over
Until I'm you

I know, I know;
They say, they say
I've come to save you
But they're different blood types anyway.

I know, I know;
They say...

Went through last week yesterday
And I didn't know it was gonna be this way

Went through last week yesterday
And I didn't know it was gonna be this way
Went through tomorrow twice today
And I didn't know it was gonna be this way

This is how I should...

My reflections have been stolen
Again and again like and addiction
My memories, they're mementos
Crawl across the streets just like little red ghosts

I'll beat me over and over
(Echo)
I'll beat me over and over
Until I'm you

I'll beat me over and over
(Echo)
I'll beat me over and over
'Til I'm you
