Bus ride, angels, in your eyes  
Lover, lover, in your skin  
Bones they drip like candle wax all around her  
Bones they break like insect wings all around her

Go get your wings

Karma, karma, crystal glaze  
Nighttime, nectar, in your veins  
Kiss and cuts and scars and sprains  
For an evening of battery acid burns are deceiving

Go get your wings

Crawling, sleeping,  
I'm falling, embrace the bugs

Are you sick of the bruises?  
You're desolate and truth less  
Left your blood on my halos  
On the backs of the fruitless

Go get your wings
