When i look around, i'll tell you what i see
I'm standing in a crowd, there's no one here but me

And on, and on, and on it goes
The sail is up without the flow
And everything that's possible's gone wrong
Where do you go when you have no one
You're all alone you chase the sun
The only friend you have is your gun
You're not alone, you're not alone

I never feel the love that you once showed me
Now everything is gone, there's no one here for me

And on, and on, and on it goes
The sail is up without the flow
And everything that's possible's gone wrong
Where do you go when you have no one
You're all alone you chase the sun
The only friend you have is your gun
You're not alone, you're not alone

Can you help me out this time, when i'm feeling down
Can you help me out this time, there's no one else
around
Can you help me out this time, i need to feel your touch
Can you help me out this time, i need this love so much
Can you help me out this time
Can you help me out this time
Can you help me out this time
Can you help me out this time
