You say we're both little people and you like it that way  
But in time I'm gonna put this body to shame (grow old)

Wear a suit like my old man

Pack up all my things and get my ass outta town

We've got it good

Whether you like this town or not

I know it's small but with a big head

it's bound to get hot

In the summer

But the summer is a bummer

If you can't leave

This pathetic excuse for a town

That holds all your memories

A lifetime of crushes and your broken dreams

To be anywhere but here

But baby anywhere is away from me

And ooh, hoo

If you got it all figured out

Then what is there to shout about

This midwest town is gonna miss you

Ooooooh

Just go ahead and work it out

But first come on and let it out

Scream it shout tell everybody that your gonna leave

In about one year you'll have it all figured out

These big city dreams are what you're about

Walking like strangers among these states

Only time will tell how long I can wait

We've got it good

Whether you like this town or not

I know it's small but with a big head

it's bound to get hot  
In the summer  
But the summer is a bummer  
If you can't leave  
This pathetic excuse for a town  
That holds all your memories  
A lifetime of crushes and your broken dreams  
To be anywhere but here  
But baby anywhere is away from me  
And ooh, hoo  
If you got it all figured out  
Then what is there to shout about  
This midwest town is gonna miss you  
Ooooooh  
Just go ahead and work it out  
But first come on and let it out  
Scream it shout tell everybody that your gonna leave  
Me again oh so casually  
Did you take the hit for me or the home team  
If you got it all figured out  
Then what is there to shout about  
This midwest town is gonna miss you
