Take photographs, Take all your memories
We've got some packing to do, We've got some
packing to do
And my jaw aches, Repetition

Take all your dreams, Take all that's left to see
Write it down, sign your name, go ahead and leave
There's nothing left to lose
Ooooohhh

The clouds rip through the sky like dynamite
To my surprise it was a beautiful sight
With our hands open wide
And I can't hide the truth as well as you
Singing woah, Singing woah

Take photographs, Take all your memories
We've got some packing to do, We've got some
packing to do
And my jaw aches, Repetition

Take all your dreams, Take all that's left to see
Write it down, sign your name, go ahead and leave
There's nothing left to lose

I've got all of these dreams
That no one cares to know about
Cares to dream about with me

All these memories haunting me, Seeking control
