Tired of her friends back home,
Waiting for good days to come,
Living life after a map...
She took of, she had enough, broken dreams were all
there was
Now she's out there on her own I wonder where she's
gone...

All lights out, the stars will guide us through our
darkest times
Belive in yourself and

Live your dreams, life's waiting for you,
Live your dreams, life's waiting for you,
Live your dreams, life's waiting for you,
Live your dreams, life's waiting to begin

He's on the edge about to fall
Lost his job he lost it all
Will it always be this way...
He's thinking of when he was young
Before all problems had begun
If he could somehow turn back time...
I wonder where he's gone...

Live your dreams, life's waiting for you
Live your dreams, life's waiting for you
Live your dreams, life's waiting for you
Live your dreams, life's waiting to begin

(Ah ah ah ah...)
Life's waiting to begin
(Ah ah ah ah...)
Life's waiting to begin
