Caring for you, is my only dream  
Loneliness is what I would have  
If I lived without you

Baby, you're the one who makes the sun shine for me  
And I always want you by my side  
Stay with me, stay with me always  
Need you more than I can say  
I love you, Barbara I love you

And if you ever told me that you would go  
It would break my heart I know  
Don't go away, don't go away

Loneliness can bring me pain  
In my heart I can't let you go  
Stay with me, stay with me always  
Need you more than I can say  
I need you (I need you more) more than you know  
(More than you know)
