Have you heard me say  
Baby I love you  
Every word is true  
I could never lie to you my love  
I could never lie to you

And did you mean  
Every kiss you gave me  
Because I meant mine  
You mean more to me  
Than all the world  
I'll love you till the end of time

Baby let me see you smile  
The one you used to save for me  
We're lovin' one another  
That's how our lives should be

Have you heard me say  
Living's not easy  
Thinking every moment of you  
You made me forget  
All my other loves  
I could never lie to you

Have you heard me say  
Baby I love you  
Every word is true  
I could never lie to you my love  
I could never lie to you  
I could never lie to you
