"Like You"

Visit "[Like You](#)" on MotoLyrics.com

(I) this is for you
(Yeah) this is for you
(This is for you) I made this for you
(This is for my baby, listen)
This is for you, you, you, you
My superstar
You, you, you, you
You know who you are

I've been around the world
But never ever found a girl, like you
Like you, like you, (you, you, you)
Like you, like you, like you

She's my girl, one and only girl
My boo, my queen, my friend, my world
She's so fly (fly), just like me
She's my star (star), destiny
Hollywood, living big city, bright lights
She's my number one
She's my Mrs. right
There's nobody else who could do it like her
I'd give her my all and that's my word
My girlfriend only comes one of a kind
So you could never find another girl like mine
My girlfriend only comes one of a kind
I love my girl that's why she's mine

You, you, you, you
My superstar
You, you, you, you
You know who you are

I've been around the world
But never ever found a girl, like you
Like you, like you, (you, you, you)
Like you, like you, like you

FYI, that's my baby
True to ya through thick and thin
Beautiful as always is

My friend, my girl, my everything
I would give her anything
Like shopping sprees and diamond rings
Cause that's how much you mean to me

I love her, I love her
No one comes above her
I need her, I need her
I would never leave her

You, you, you, you
My superstar
You, you, you, you
You know who you are

I've been around the world
But never ever found a girl, like you
Like you, like you, (you, you, you)
Like you, like you, like you

Forget about the world
It's just you and me
And we gonna stay together through eternity
You'll never be alone and I don't wanna go
You're the only one that makes me whole

This is for you, you, you, you
My superstar
You, you, you, you
You know who you are

I've been around the world
But never ever found a girl, like you
Like you, like you, oh yeah like you,
Baby baby baby, like you, like you like you
