You walk by assured but you're curious you know some things but you're restless  
Go to everyone that you think you know and talk too much you talk too much oh  
And any time and any place you're always in a person's face but they don't seem to know oh  
Acting like you're their best friend it cancels out the fact that you annoy them all to death  
Walk love hate lie all in a weekend's eye, lead on lay off they cry you sigh  
Right here right now, now is your brightest day, I hate to say but I feel the same way  
Because you are Ms. Kiss Kiss Bang Bang the kiss entices all to join  
And then you take your gun bang bang you shoot them down just cause you can
