[Originally by Lifetime]

When I feel that coming tension I wanna run in your
direction.

When panics got me by the collar I need to go your
way.

If it feels right I'm gonna stay out tonight.

Cut the Tension.

Cut right through.

I'm coming straight for you

It's true.

Tonight I'm on my way.

She smiles.

She holds her head just right,
because she knows she's the one.

When I feel that coming tension I wanna run in your
direction.

When panics got me by the collar I need to go your
way.

If it feels right I'm gonna stay out tonight.

Cut the Tension.

Cut right through.

I'm coming straight for you

It's true.

Tonight I'm on my way.

She smiles.

She holds her head just right,
because she knows she's the one thing I can't touch.

That's right I'm making something

I tried to make it something

I tried to make it something

You can't be part of something

You can't be the sun to make it right

To see the sun to make it right
