Distance means nothing to me
It only makes me wanna see you longer
My words just like a mentioned kiss
With every letter they are growing stronger

Days go by
The feelings, they go on
Oh unfortunately without you
It will never snow in Florida

It's best to take your time
Conversation cuts like glass
I'm the calm before the storm
Oh, I'm the second before the crash

Well I've been between myself for days
Well I've been between myself for days
Well I'm the hero of the year

Distance means nothing to me
It only makes me wanna see you longer
Yea yea yea yea

And the days go by
The feelings, they go on
Oh unfortunately without you
It will never snow in Florida

It's best to take your time
Conversation cuts like glass
I'm the calm before the storm
I'm the second before the crash

Well I've been between myself for days
Well I've been between myself for days
Well I'm the hero of the year

Well I've been between myself for days
Well I've been between myself for days
Well I'm the hero of the year
