Well I started all alone
And I've watched you grow
And now please don't take this away from me.
You rise then you fall
Sometimes it seems like you're not there at all
But that's the way it should be

Well take me for example
And erase your opinions about me
Only time will tell.
Take me for example
And erase your opinions about me
Only time will tell

Where will you be?
Where have you gone?
Two years of my life
Now it's all gone

All gone

Where have you been?
Where have you gone?
Two years of my life
Now it's all gone

Where will you be?
Where have you gone?
Two years of my life
Now it's all gone

Take me for example
And erase your opinions about me
Only time will will tell.
Take me for example
And erase your opinions about me
Only time will tell
