"Poison Street"

Visit "Poison Street" on MotoLyrics.com

We were singing in the rain like we invented singing
There's a light in the sky from a million street lights
And we were danced all the steps from all those old
time movies
Rolling down the hill with laughing hearts

In Poison Street we'll go crashing
In Poison Street

We were singing

We were singing in the rain like we invented singing
There's a light in the sky from a million street lights
And we were danced all the steps from all those old
time movies
Rolling down the hill with laughing hearts

In Poison Street we'll go crashing
Through the walls that history made for us
In Poison Street we'll spring the traps
And race away

And I love you now like I love you always ever
Yeah, kissing in the dark like a couple of kids
You gave me life, you gave me light and thunder
Like a blind man's fire on the very first time

In Poison Street we'll go crashing
Through the walls that history made for us
In Poison Street we'll laugh out loud
Until the shadows go melt away

So just a kick for this dark damned city of ours
And a kiss, woah, a kiss for you
And just a drink, woah, a toast to the days to come
Now Poison Street won't break us any more

We were singing in the rain like we wrote that song
There's a light in the sky from the streetlights all
around
You gave me life, you gave me light and thunder
Like a man makes fire for the very first time

In Poison Street we'll go crashing
Through the walls that history made for us
In Poison Street we'll laugh out loud
Until the shadows go melt away

So just a kick, woah, for this dark damned city of ours
And a kiss, woah, a kiss for you
And just a drink, woah, a toast to the days to come
Now Poison Street won't break us any more
Poison Street can't touch us any more
