Creeping up from behind  
You've got nowhere to hide  
See her shadow in the night  
She's gonna take away your life [x2]

A faceless girl in the deep dark night  
Her footsteps lost and out of sight  
She's got one thing on her mind  
To take away your life [x2]

[Chorus]  
She's got a gun  
And there is no way of stopping her  
She's got a gun  
You got nowhere to hide  
She's got a gun  
And there is no way of stopping her  
She's got a gun  
She's coming for you tonight

You sit and wait til you are safe  
You cry for help but it's too late  
She found you sitting there alone  
Into death's arms you were thrown [x2]

[Chorus]

Now you're dead she's left to roam  
The streets are quiet and off she goes  
Searching for new victims lying low  
She's out to kill and they'll all know

[Chorus]
