... Kiss it Goodbye

Hollywood is plastic but easy on the eyes
Big Apple is fantastic but cuts you down to size
they'll treat you like a door mat expecting you to fail
says right across your forehead "integrity for sale"

You'll be on TV when it starts to snow in hell
(teach you that you better flaunt it
make you wish you never got it)
you won't believe me so go and see it for yourself

That brunettes move to New York
blondes love California
east coast digs the cocaine
west coast marijuana
don't be surprised
when you swallow more than pride
it's tough to see through bullshit
when it's up above your eyes

... Kiss it goodbye

Stealing comes with practice
lying comes with ease
neither one is faster than falling to your knees
money leads to fame and fame is the disease
the latest epidemic...
reality TV

You'll be on TV when it starts to snow in hell
(teach you that you better flaunt it
make you wish you never got it)
you won't believe me so go and see it for yourself

That brunettes move to New York
blondes love California
east coast digs the cocaine
west coast marijuana
don't be surprised
when you swallow more than pride

it's tough to see through bullshit
when it's up above your eyes

They won't let
you get out alive
your ass
grab it
... and kiss it goodbye

They won't let
you get out alive
your ass
grab it
... and kiss it goodbye

So let's move to New York
or out to California
east coast digs the cocaine
west coast marijuana
don't be surprised
when you swallow more than pride
it's tough to see through bullshit
when it's up above your eyes

They won't let
you get out alive
your ass
grab it
... and kiss it goodbye

They won't let
you get out alive
your ass
grab it
... and kiss it goodbye
