Version Girl
Oh you come and you go,
Version Girl
Just like the morning sun.
It's so hard to find a personality with charms like yours
for me.
Oo-ee, oo-ee, oo-ee

Version girl, what's your name?
Don't you know I long to say.
Version Girl, what's your name?
Just like the morning sun
It's so hard to find a personality with charms like yours
for me

I sit in the sun waiting for you to come along
So my heart will be satisfied
So please let me be your number one
Under the moon, under the stars and under the sun

Version girl, what's your name?
Don't you know I long to say.
Version Girl, what's your name?
Just like the morning sun
It's so hard to find a personality with charms like yours
for me

Version girl, what's your name?
Don't you know I long to say.
Version Girl, what's your name?
Just like the morning sun
It's so hard to find a personality with charms like yours
for me
