For you I got lost  
For you I left everything forever  
You called me I came  
I got stabbed in a heart  
I feel broken empty  
The tears won't fall anymore

I got the rests of your life  
I was like a dog at your command  
I humbled in the name of love  
It's the end of Your love

How could you humiliate me

You betrayed everything I believed.  
Adversity and fear of loneliness  
Kill me slowly every day

For you I got lost  
For you I left everything forever

It was the last phone I answered.

You left me all alone  
I'm not your friend anymore.
