I want to be the air you breathe into you  
Each breath you take will fill you with my love  
I'll paint the world so all you see is beauty  
Just say the word and I'll be by your side.

And if you find you've fallen into darkness  
And the light seems miles away

You can hold onto me  
Baby, I'll never leave  
If you take my hand I won't let go  
Until you tell me when  
'Til then you can hold onto me  
Hold onto me

The walls could fall and crumble into nothing  
But I'll be here to build them up once more  
At night, alone, through any tribulation  
We'll stand at the start; together you and I.

And if you find yourself in deeper waters  
And you know I'm on my way.

You can hold onto me  
Baby, I'll never leave  
If you take my hand I won't let go  
Until you tell me when  
'Til then you can hold onto me  
Hold onto me

Nothing will ever be too much  
I'll be there no matter what  
Baby hold onto my love

Baby, I'll never leave  
If you take my hand I won't let go  
Until you tell me when  
'Til then you can hold onto me  
Hold onto me
