### "The Ghost We Summoned"

Visit "[The Ghost We Summoned](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Modern-day alchemy  
Miracle technology  
Mankind's vanity  
To control the elements  
Catastrophic synergy  
Circumstances collide  
Fate rears it's ugly head  
The infallible fails

Play with fire  
You'll get burnt  
One step from the nuclear abyss  
Play with fire  
You'll get scorched  
Hell awaits at the flick of a switch

A silent killer  
Is riding the wind  
Penetrating cells  
The structures of life  
Invisible collapse  
Irreversible decay  
Everything it'll touch  
Shall return to dust

Play with fire  
You'll get burnt  
One step from the nuclear abyss  
Play with fire  
You'll get scorched  
Hell awaits at the flick of a switch

At the threshold of doom  
A recipe for disaster  
The ghost we summoned  
Can't be driven away  
At the threshold of doom  
One-way street to extinction  
The ghost we summoned  
Is here to stay

The ghost we summoned  
Can't be driven away  
The ghost we summoned  
Is here to stay

Living under an imminent threat  
On the verge of disaster  
Seconds away from annihilation  
Through our own device  
Holding on the foolish belief  
Of our relative safety  
Forced to face the unspeakable  
Armageddon unleashed

At the threshold of doom  
A recipe for disaster  
The ghost we summoned  
Can't be driven away  
At the threshold of doom  
One-way street to extinction  
The ghost we summoned  
Is here to stay

The ghost we summoned  
Is here to stay
