Since she was seventeen
I was her guy
She was the light of my life
Well of all the silly games
We used to play
Love was the first thing we prized
So unexpectedly became a thief
I heard these things happen
But never to me
Left me walking in shadows
Stumblin' blind
Searching for ways to get by
Got to find me a girl
Who can change my world
And make, make it all worthwhile
Take it all away
And my heart see clear
Love is the last thing
It's just the last thing
Love is the last thing to go
See all the lights laid out
Below my feet
The city's so quiet tonight
Someone is waiting for me down there
It's time to get back in this life
Got to find me a girl
Who can change my world
And make, make it all worthwhile
Take it all away
And it's all so clear
Love is the last thing
It's just the last thing
Love is the last thing
Oohooohoo
Oh, it's just the last thing
Love, love is the last thing to go
Love, it's the last thing
