(Stips)

Another story's over - Memories are new
You walk alone along this lonely avenue
You thought she had a whole world to offer
You found out there is no more to discover
All you feel around is this coolness of her
You turn the key around twice - Memories are new
You do the things

You'd never thought that you would do
You never got a colder shower
Lay wide awake in lonely hours
Now you're thrown away like a fading flower
You thought she had a whole world to offer
You feel that there is no more to discover
All you feel around you is an album cover
