

No Harm Done "A Racist World"

Visit "[A Racist World](#)" on MotoLyrics.com

Erasing the bigots along with our fears
Won't clear the hate from the past years.
The Klu Klux Klan is getting off easy,
Shootings and hangings for a hundred years.
You think you can accuse me, accuse me of a crime?
You say that I did something years before my time.
Well I am not a racist, my life's not based on hate,
Look me in the eyes and you'll see that it's just fate.

This is planet earth please come and stay,
We'll give you a home and then take it away.
You may choose the country some are just the same,
You make the decision you soon might not have a say.

In a racist world there are no limits to live by,
This may be a good thing unless you want to die.
History has a past of racism in it self,
Just because we're a new generation doesn't mean that
we can except it.

You say you're not a racist, you say we're all the same,
But you label us with names "blacks, whites, and
mexicans."
If this really was the united states
Then we wouldn't have to be writing this song
To explain there's no difference between you and me.
History has a past of racism in it self,
Just because we're a new generation doesn't mean that
we can except it.
In a racist world there are no limits to live by,
This may be a good thing unless you want to die.
