Too much thinking can ruin you. that's the style chaos is in. imagining your death is almost a setimental feeling. giving a massage with a knife blade. writing a love song with a loaded gun. breaking concrete with your face, this is what dreaming disaster is like. that's the style chaos is in. 1,2,3, die. this is what dreaming disaster is like. i will watch the sky until your ghost flies high and crashes into a shooting star. wanting vengeance for the hurts you inflicted feels so necessary. blood is not enough for you to redeem you
