

No Harm Done "It's Too Late"

Visit "[It's Too Late](#)" on MotoLyrics.com

My world is changing
The sky used to be so true
I'm losing faith I can't see any use
The mountains will fall
The seas will rise up
And cover us all

I can't do this on my own
I can't change what we've been shown

We need to merge and open the minds and eyes
Of the ignorant that can't accept the facts in front of
their face

It's too late you've made up your mind
It's already changed for our future kids
Wait there won't be any if it stays like this

You are blinded by tradition
And all the promises they've told
You are blinded by tradition
And all the values you hold
