too many people acting so strange.
what is it all about?
sure hope they're happy now.
so much for seldom thoughts of frustration
to hold me over as you proudly get paid.
so easy i can do the testing.
you simply fake the score or you can trade it
for a 9 to 5 professional to let you know...
you're back where you started some time ago.
you brushed it off, it didn't stop you.
didn't bother me 'til now.
it's a change of direction.
we're seeing everyone pretending to be original
by being pigeon holed.
ascending high into the emptiness, we found a way
to fill the blank canvas sky.
so picture perfect are my choices.
to go the easy route, been hearing something about
a 9 to 5 professional to let me know...
i'm back where i started some time ago.
