Let me tell you about a girl that I went with
She told me that our lives were surely (help)
And the time came when I wanted to regress
All because of what before all because of what before
And I don't want to take a chance now
Cause I don't want to have it turn out like before
You and I can take it slow now
And I don't want to take it down, with me
And a girl that I knew came into my life
She filled every hole that was left inside
And the time came when I wanted to regress
All because of what before all because of what before
Now I don't want to take a chance now
Cause I don't want to have it turn out like before
You and I can take it slow now
And I don't want to take it down, with me
There comes a time in someones life
When someone should have realized
I should have recognized I should have recognized
And I don't want to take a chance now
Cause I don't want to have it turn out like before
You and I can take it slow now
And I don't want to take it down, with me
