Lyrics: Pett

Music: Clement, Antonio, Pouchin

Carcass of synthetic corpse  
No longer part of the human blood  
Drained from my flesh, my skin is the shell  
Serving me the machine

Stage of transmission  
My heart disconnected  
I can not see, I can not feel anymore  
Victim of the modern world  
Victim of the modern world  
Victim of a synthetic progress,  
Epidemic of the modern world

Refrain:

Suffocation, strangulation, as my body leaps,  
Extraction, dislodging, my soul is leaving me  
Operation, production, they are abusing me  
Implantation, transmutation, I am a biomechanoid

Give me the strength to run away  
Give the capacity to make my way  
Give me the force to respond  
Give me the might I haven't found

Drained from my flesh, my skin is the shell  
Serving me the machine
