

Nocturne "Shock"

Visit "[Shock](#)" on MotoLyrics.com

I have come alone
I have opened myself
I bear all to you
Things seen by no one else
I will walk a thousand years
By your side
But still I'll never know the one
You've kept away inside
Take me on this tragic day
I want to learn to feel
The truth was once uncovered here
But all is erased and washed away
I will never feel you
I will never feel you
I will never feel again
Catch me on this tragic day
I want to learn to live
The truth was once discovered here
And I've thrown it all away
I will never feel you
I will never feel you
I will never feel again
