Light the match burn the flower
Leave behind all the wrong
Why be Sad when happiness can be bought for
A little more than free modern
Day prohibition
Are we men?
Are We children?
At what age can I choose how to live?
The only real Drug problem is scoring real
good drugs.

Havent we learned our lesson?
The corner store sells finer scotch,
but who's got uncut powder?
We just want what is ours (Dignity)
If God created plants and buds
that I find and abuse then,
who the fuck are you to judge me?
