We call the heartland not very smart land, IQ's are very low but threat levels are high  
They got a mandate, they don't want man-dates, they got so many hates and people to despise

In the dust bowl, cerebral black hole, the average weight is well over 200 pounds  
I hate to generalize, but have you seen the thighs, most haven't seen their genitalia in a while

Maybe that's why they're so scared of us  
We've concerns other than fear and hunger pangs

Queers, transgends, and lesbians, vegans and vegetarians  
All you brownish red and yellow ones come and join us on the coast

No longer svelte, they gotta punch new holes in the Bible belt  
They've blown out the fire under the melting pot, the red blood of America is starting to clot  
No compromise, no sight through others' eyes, they're just flies spreading pieces of shit  
You gotta emigrate, stop living in hate, what makes this country great is dwelling on either side

They don't want visitors in Jesusland  
They want life canned and bland in the fatherland

We want people with college degrees, drug use experience and STD's  
People with open-minded philosophies, come hug California trees

Cultural revolution now, neo-conservatives run outta town  
We're gonna burn Orange County down,  
And then we're off to Riverside, Bakersfield and Fresno too, then we're coming after you

The fear stricken, born again Christian, they got a

vision a homogenized state  
Textbook decline, Intelligent Design  
they got bill nye on the list execrate

They don't want visitors in Jesusland  
They want life canned and bland in the fatherland

Punk Rockers and emo kids, people doing things the  
church forbids  
Buddhists, agnostics, and atheists we're moving out of  
jesusland  
Art students and thespians, excluding country, all the  
musicians  
We want all hookers and comedians, nihilists are  
welcome too

No longer svelte, they gotta punch new holes in the  
Bible belt
