Go away sunny day
All the horny people sitting in front of their TV and
thinking
What is wrong with me I'm not a monster
Why won't anybody fuck me
I don't wanna live life lonely
Why does everyone have to be perfect

Go away sunny day
All the barflys sipping whiskey
Fighting ever present pity
Wondering what they are sucking back for
Is it the drink or trepidation,
Watching all trains leave the station
Left standing alone without a ticket

You light up my life
You give me hope to carry on

You light up my days
And you light up my life

Go away sunny day
Stop searching cause there's no answer
Just a long line of disaster
There's no simple way to stop the sadness
Life's not fair I'm glad it's not
This isn't heaven just a lonely planet
On the verge of self destruction
