No house to live no one want give  
nobody cares about what people need  
we need a system who assures everybody occupation  
we need a doctor who cares about the health of the  
nation  
and when the working class is going on strike  
no more police they are yust claiming their right  
no more police they are yust claiming their right

People must work all life long yust to make the rich  
more strong  
after this deserving prize  
dem give you pension degreeding meagre pension  
what can you ask more dis what can need  
what can ou ask more dis

RIT. Politics rules social iniquity and every where  
there's a lot  
of burocracy loosing your time from officeman you  
must run.  
Democracy means power to the people  
no distincion in class race or religion  
but poverty brings wickness submission few rights  
while president speaking in the ghetto they must fight  
in the ghetto they must fight.

Rit.....

People must.....
