Ain't got nothing to lose
I ain't got nobody to blame
Driving down the south circular
I'm driving in to sabotage
I feel like a superstar
I'm ready to seize the night
I just wanna hold you hand
Squeeze it with all my might
We're too busy chasing stars
To ever give up your fight
Crashing like racing cars
When will I see the light?

Yeah, yeah
Don't say it's over
Live for the moment
Just let the music play.
Don't say it's over
Live for the moment
Just let the music play.

Just cool it and sneak around
For the nightmare of yesterday
And one day he'll work it out
But tonight I'm running away
And that's what the future holds
Now I left you behind
For now my only goal
Is to keep you off my mind
Too fancy chasing stars
To see the fading night
Tearing the world apart
When will I see the light?

Yeah, yeah
When will I see the light?
Yeah, yeah
Don't say it's over
Live for the moment
Just let the music play.
Don't say it's over

Live for the moment
And let the music play
Just let the music play

When will I see my true destiny
Staring at me just as plain as can be
That you wrapped your wings around my heart
Knew it was destined to fail
Whatever the future holds
Now I've left you behind
And now my only goal
Is to keep you off my mind
To busy chasing stars
To see the fading night
Tearing the world apart
When will I see the light?

Up there
Yeah, yeah
Don't say it's over
Live for the moment
Just let the music play
Don't say it's over
Live for the moment
Just let the music play.

When will we see the light,
Up there, up there, up there
Up there, up there, up there
Up there, up there, up there
Just let the music play
Don't say it's over.
