Young punk dumb fool white coon nigga  
Little big bad ass boy up the river  
Hear these lyrics at a fever pitch I deliver  
Come mess with me test me I'm a swift hitter

In this land there's a race that time forgot  
And for the land in this time the race was shot  
Did they die out quickly or slowly rot?

Does it help when you're just a day old  
To be surrounded by gold when your souls been sold  
Fail to listen to the truth when it's been told  
You'll be ost in the cold life force losin it's hold

If there's something that we must be made aware of  
It's the places that we must take care or  
Fail to listen fears of missing out if you don't wanna  
Share then you'll get no share of

What is the reason for you acting like that  
So many ways to get played trying to be where it's at  
Now if you just wanna be yourself what's who you really  
are  
It's not that I even care, but you won't have to act, yeah
