"After A Silence Part I"

Visit "[After A Silence Part I](#)" on MotoLyrics.com

In days of darkness skies
When clouds turn the white colour of water
In black words of never end, make the dust of my
dreams
(And) the past of my memories in eternal wishes of
moment
And let me out of your side, remember that you said...

... remember that you said

See the end of the day...
See how the light die in your arms
Let me be the guard of all your dreams
The side of your remains

Remember that you said... that you said

Holding in my hands the silver eye of a thirsty moon
Who claims the wine of your blood
And the flesh of your body
To feel how much hurts your memory
Forgetting what you said you stand and walk alone
