Hey, Oh

[Verse 1]

I just wanna be your man
Mmm, and show you who I am
But I won't rush my love for you
If you don't feel it too
Come with me and you will see
How deep my love for you can be

[Pre-Chorus]

If you let me know then I can't let go
And release me from you
And if you don't tell me
Then I won't break free
There must be something
I can do

[Chorus]

But come with me and I won't let you go
Come with me and love will let you know
On and on
I'll be right here next to you
No one's ever gonna let you down
Not as long as you got me around
You got me around
Right here next to you

I'm right here baby, yeah

[Verse 2]

I am feeling you inside
Please let me stay here for the night
Tell me how you feel just let me know
Baby should I stay or should I go

[Pre-Chorus]

And if you let me know then I can't let go
And release me from you
And if you don't tell me
Then I won't break free
Is there something
I can do

[Chorus]

But come with me and I won't let you go
Come with me and love will let you know
On and on
I'll be right here next to you
No one's ever gonna let you down
Not as long as you got me around
You got me around
Right here next to you

[Bridge]

The days go by
I watch you cry
Just let me be the one who wipes away your tears
At night

[breakdown-chorus]

Come with me, I won't let you go
Come with me, no no
On and on, I'll be right here next to you

[Chorus] - to fade

But come with me and I won't let you go
Come with me and love will let you know
On and on
I'll be right here next to you
No one's ever gonna let you down
Not as long as you got me around
You got me around
Right here next to you
