You finally found someone to watch the sunset with  
You finally found a girl that makes you shine  
And all you ever wanted was for her to be  
By your side  
I hope you take the time to understand me now  
If I said some things you might not like to hear  
But it's only me and how I feel about you  
You are my friend  
Watching over all the years I've known you now  
You've been looking through the glass at shooting  
stars  
And all you ever wanted was for them to see  
Who they are, it's not *so far*  
So forgive me if I ever disappointed you  
And said some things you might not like to hear  
But it's only me and how I feel about you  
You are my friend
